

Augusto do Nascimento Omena

Full Stack Developer

Summary

Developer with experience in interdisciplinary applications, specialized in Full Stack development. For the past 7 months, I've been working as a freelancer for Studio dynamic software that impacts various industry sectors enhancing my expertise in .NET and Angular.

Relevant Experience

IT Technician • **Firjan** October 2024 - Present

- Responsible for updating components of the training management system of Eletronuclear using .NET Framework 4.8 and AngularJS.
- Management and support of the SQL Server 2017 database, creation of procedures and new features of the system.

Full Stack Developer • **Builtcode** April 2024 – October 2024

- Responsible for the development and implementation of new features in internal products and partner solutions using .NET and Angular.
- Participated in interdisciplinary projects, collaborating on all project layers and ensuring efficient integration between back-end services and the user interface.

Developer Internship • **PMAR** September 2023 - April 2024

- Developing responsive websites using HTML, CSS, and JavaScript.
- Gained substantial experience in web development, building simple APIs and websites with the .NET framework

Naval Industrial Electrician Apprentice • **Firjan** May 2022 – May 2023

- Development of solutions using C#, Java and C++, with a focus on industrial automation and process improvement
- Innovated by creating an industrial engine monitoring application (for Windows) that generates data through sensors, with graphs and alerts of anomalies in real time.

Skills

Programming Languages

C#, Java, Kotlin, Typescript, HTML, CSS

Libraries & Frameworks

.Net, Angular, Spring Boot

Tools & Platforms

Git, GitHub, Azure DevOps, Docker, SQL

English level

B1

Selected Project

API Base .NET 8

This project serves as a template for .NET 8 APIs, following Clean Architecture principles. It comes with a basic authentication and authorization system already in place, providing a robust and scalable structure for developing secure and high-quality APIs. Ideal for projects that require a strong foundation with best practices in design and security.

Education

Centro Universitário Senac

Bachelor's degree, Technology in Systems Analysis and Development · (June 2022 - December 2024)
